# **Module Three**

## SLOs with Consequences

- 1. Glossary
- 2. Key Points
- 3. Reflection Activity
- 4. Postmortem Template

#### 1. Glossary

- Blameless postmortem: Detailed documentation of an incident or outage, its root cause, its impact, actions taken to resolve it, and follow-up actions to prevent its recurrence.
- **Reliability:** The number of "good" interactions divided by the number of total interactions. This leaves you with a numerical fraction of real users who experience a service that is available and working.
- **Error budget:** The amount of unreliability you are willing to tolerate.
- **Service level indicator (SLI):** A quantifiable measure of the reliability of your service from your users' perspective.
- Service level objective (SLO): Sets the target for an SLI over a period of time.

#### 2. Key Points

- The mission of SRE is to protect, provide for, and progress software and systems with consistent focus on availability, latency, performance, and capacity.
- Understanding SRE practices and norms will help you build a common language to use when speaking with your IT teams and support your organization's adoption of SRE both in the short and long term.
- Experienced SREs are comfortable with failure.
- Failures are documented in postmortems, which focus on systems and processes versus people.
- 100% reliability is the wrong target because it slows the release of new features, which is what drives your business.

- SLOs and error budgets create shared responsibility and ownership between developers and SREs.
- Fostering psychologically safe environments is necessary for learning and innovation in organizations.
- Organizations developing an SRE culture should focus on creating a unified vision, determining what collaboration looks like, and sharing knowledge among teams.

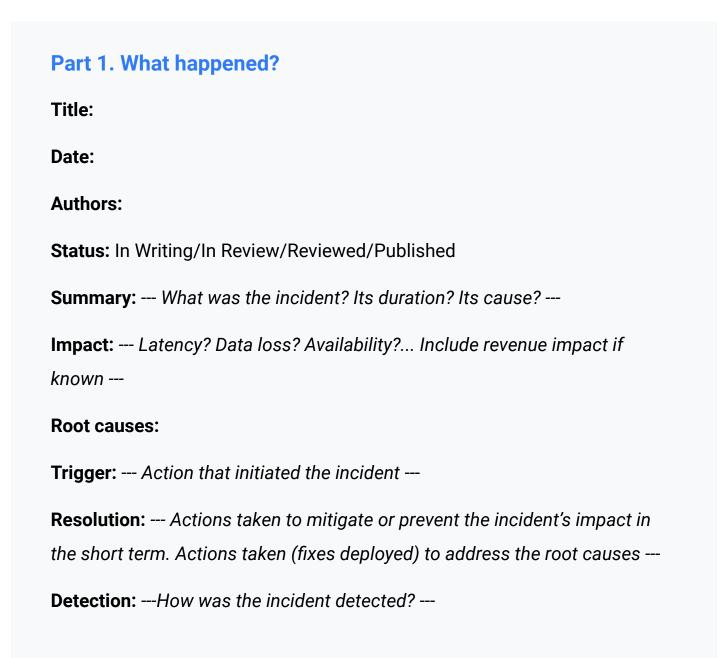

### 3. Reflection Activity

| <ol> <li>Think about your IT teams. List some scenarios where working in a<br/>psychologically safe environment would benefit them.</li> </ol> |  |  |  |  |
|--|--|--|--|--|
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |

| 2. Do you think blamelessness is achievable in your organization? How can<br>you support and encourage blamelessness and psychological safety within<br>your teams? |  |  |  |  |  |  |
|---|--|--|--|--|--|--|
| Write down as many ideas as you can. Share these with your leadership team when you start your SRE implementation conversations.                                    |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |

#### 4. Postmortem Template

Below is a basic postmortem template. Share this with your IT teams as you start to implement the SRE role and postmortem practice.

#### **Lessons Learned**

Some guiding questions:

- Was the incident detected quickly, or did it take a long time for a human to notice?
- Did teams coordinate well among each other, or were there communication problems?

| wnat  | went well?  |                    |                                 |  |
|-------|---|--------------------|---------------------------------|--|
|       |   |                    |                                 |  |
| What  | didn't go so well?  |                    |                                 |  |
|       | e did we get lucky?<br>is often some aspect of an inc         | cident that ensure | es that it wasn't as had as it  |  |
| could | have been. Often, this aspect viild new safeguards and not re | vasn't by design.  | Call this out explicitly so you |  |
|       |   |                    |                                 |  |

### Part 2. What can we do differently next time?

- Work together to document what you've learned from these issues and come up with Action Items.
- Note: Do not focus solely on bug fixes. Also include procedural changes required to mitigate the impact of similar incidents.

| Owners | Action Items | Priority | Bug/Tickets |
|--------|--------------|----------|-------------|
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
|        |              |          |             |
